NOSHER KHALID

SENIOR iOS ENGINEER | iOS ARCHITECTURE & TECHNICAL LEADERSHIP

Lahore, Pakistan | +92-322-322-2254 | nosherkhalid@gmail.com | linkedin.com/in/nosher-khalid | github.com/nosherkhalid

PROFESSIONAL SUMMARY

Senior iOS Engineer with 7+ years of experience building and shipping native iOS products across social, education, communications, travel, health, and consumer applications. Strong hands-on expertise in Swift, SwiftUI, UIKit, Combine, Swift Concurrency, MVVM-C, Clean Architecture, modularization, networking, testing, and production reliability. Experienced in owning features end-to-end, modernizing legacy codebases incrementally, mentoring engineers, reviewing code, collaborating with product/design/backend teams, and driving delivery from requirements through App Store release. Uses AI-assisted engineering tools such as Claude Code, Cursor, ChatGPT, Figma MCP, and CodeRabbit to accelerate development while maintaining architecture and code-quality standards.

TECHNICAL LEADERSHIP

- Technical ownership: architecture decisions, feature ownership, code reviews, mentoring, and engineering standards.
- Delivery leadership: translate requirements into shippable work, coordinate with product/design/backend/QA, and consistently meet release deadlines.
- Modernization: incrementally introduce SwiftUI, MVVM-C, modular Swift Package Manager architecture, dependency injection, and Swift Concurrency into established codebases.
- Engineering quality: unit testing, crash investigation, performance profiling, CI/CD practices, release quality, and production troubleshooting.
- AI-assisted development: practical use of Claude Code, MCP servers, Cursor, ChatGPT, Figma MCP, and CodeRabbit in production workflows.

TECHNICAL SKILLS

Languages & Apple Platforms	Swift, SwiftUI, UIKit, Foundation, Swift Concurrency (async/await, actors), Combine
Architecture & Design	MVVM-C, Clean Architecture, MVVM, Coordinator Pattern, Modular Architecture, Swift Package Manager, Protocol-Oriented Dependency Injection
Networking & APIs	REST APIs, URLSession, async networking, interceptors, retry/backoff, multipart uploads, API integration, JSON/domain mapping
Data & Storage	Core Data, Realm, Firebase Firestore
Testing & Reliability	Swift Testing, XCTest, Instruments, Crashlytics, unit testing, performance profiling, production debugging
UI & Accessibility	Auto Layout, SnapKit, Storyboards, Diffable Data Source, VoiceOver, Dynamic Type
CI/CD & Tooling	Git, Git Flow, GitHub Actions, CocoaPods, SPM, App Store delivery
Communications & SDKs	Twilio Video/Voice, PortSIP, PJSIP, Firebase
AI & Developer Tools	Claude Code, MCP servers, Cursor, ChatGPT, Figma MCP, CodeRabbit, Claude API

PROFESSIONAL EXPERIENCE

Sr. iOS Engineer — DeltaDots | Oct 2024 – Present

- Own native iOS feature development for Flic, a digital business-card and social networking platform with NFC, chat, feed, and profile experiences.
- Shipped SwiftUI feature surfaces across Bundles and Broadcast, helping establish reusable SwiftUI conventions for the iOS team.
- Designed an incremental SwiftUI/MVVM-C modernization for the Manage Profile flow, using a Coordinator bridge into the existing legacy router to avoid disruptive migration.
- Built phone-contact import and matching capabilities and contributed to the Network module using typed domain-model mapping and Swift Testing coverage.
- Introduced practical AI-assisted development workflows using Claude Code with project-specific architecture rules and MCP servers, plus Cursor, ChatGPT, Figma MCP, and CodeRabbit.
- Established Git Flow branching conventions and contributed to code-quality, review, release, and engineering-process improvements for a 3-developer iOS team.

iOS Development Consultant — Upwork (Freelance) | Nov 2022 – Sep 2024

- Delivered iOS features for SkillPlace, DreamSpark, and personal products across education, social networking, and consumer use cases.
- Built SkillPlace's UIKit application architecture and real-time teacher/student video-calling capability with Twilio APIs within a 1.5-month delivery window.
- Diagnosed and resolved production bugs, UI regressions, and performance issues for DreamSpark, supporting a stable App Store release and improved product reliability.
- Built a Threads-inspired SwiftUI + Combine social application with post creation/editing/deletion, profiles, and a real-time feed as an architecture-focused product exercise.
- Built production-oriented SwiftUI projects integrating REST APIs, Core Location, local notifications, and reactive state management.

Sr. iOS Engineer — King Revolution | Apr 2022 – Nov 2022

- Integrated PortSIP VoIP capabilities into SlickCall's eSIM product, enabling in-app SIP audio calling and working with low-level PJSIP bindings.
- Owned integration, debugging, and release-quality work across client deliverables, collaborating directly around QA and client testing.

iOS Engineer — Tiksom Pvt Ltd | Jul 2021 – Feb 2022

- Implemented StoreKit in-app purchase and subscription flows for TapForJoy, including multiple subscription tiers and receipt-validation edge cases.
- Delivered mood tracking, anxiety logging, habit tracking, and breathing-exercise functionality for Earkick within a focused 1.5-month engagement.
- Streamlined authentication and onboarding flows for Holiday Swap, a travel platform with a global user base.

iOS Engineer (Contract) — Emblem Technologies · Piecyfer · ArhamSoft | Feb 2020 – May 2021

- Developed core screens and features for OnlineDoc and SafeStart, focusing on production UI fidelity, reliability, and bug resolution.
- Contributed UI improvements and production bug fixes for Love at First Swipe, a global consumer dating application.
- Used Crashlytics and Instruments to investigate stability and performance issues across production iOS applications, contributing to a 30–40% reduction in crash-related issues where measured.

iOS Intern — AlphaSquared | Aug 2019 – Feb 2020

- Built a complete Quran application from scratch, including JSON-based Quran text rendering, Qibla direction, prayer timings, and local notification alerts.
- Developed an office attendance logger using Estimote Bluetooth beacons and Firebase for proximity-based clock-in/out.

SELECTED ENGINEERING PROJECTS

- **Modular Image-Loading Pipeline** — Swift Package Manager, TDD. Designed a 6-package architecture spanning CoreKit, NetworkKit, CacheKit, ImageServiceKit, ImageListFeature, and ImageDetailFeature, with protocol boundaries, memory/disk caching, and package-level TDD coverage.
- **Movie Search App** — UIKit, Combine. Implemented MVVM Input/Output, reactive state management, debounced search, and cursor-based pagination.
- **Threads-Inspired Social Feed** — SwiftUI, Firebase. Built real-time post creation/editing/deletion, user profiles, and a live-updating feed using Firestore listeners.

EDUCATION

M.S., Electrical Engineering — University of Central Punjab | 2016

B.S., Electrical Engineering — FAST-NUCES | 2014
